INDEX TO VOL. XXVII.

ACAPNIA, relation to shock, 152.
Adrenalin produces glycosuria after thyroidectomy, 331.
Alcohol affects nitrogenous metabolism, 1.
Allantoin excretions in monkey, xv.
Anæsthesia, local, relation to sensory changes in skin, 45.
Anaphylaxis, xxiv.
Antagonism of salts, xxxii.
Asphyxia, rise of blood pressure, xxii.
AUER, J. Acute anaphylactic death in rabbits, xxiv.

BARBOUR, G. F., and P. G. STILES. On localized contraction in skeletal muscle, xi.
BARRINGER, B. S. See BARRINGER and BARRINGER, 110.
BARRINGER, T. B., JR., and B. S. BARRINGER. A comparison of the total nitrogen excretion of either kidney in normal individuals during varying periods of time, 119.
Baths, cold, influence on glycogen content, 427.
BECHT, F. C. See LUCKHARDT and BECHT, xvi.
BECHT, F. C., and A. B. LUCKHARDT. The source of the immune bodies in the lymphs, xi.
BENEDICT, F. G., L. E. EMMES, and J. A. RICHE. The influence of the preceding diet on the respiratory quotient after active digestion has ceased, 383.
Blood pressure, asphyxial rise in spinal animal, xxii.
——, pulmonary circuit, xxi.
——, relation to secretion in kidney, 24.
BROOKS, C. The effect of lesions of the dorsal nerve roots on the reflex excitability of the spinal cord, 212.

CANNON, W. B. Some observations on the nature of gastric peristalsis, xii.
CANNON, W. B., and C. W. LIEB. The receptive relaxation of the stomach, xiii.
CARLSON, A. J. The effects of stretching the nerve on the rate of conduction of the nervous impulse, 323.
CARLSON, A. J., J. F. ROOKS, and J. F. MCKIE. Attempts to produce experimental hyperthyroidism, xiii.
Cell division, dynamics of, 240.
——, relation to calcium salts, 289.
Cerebrospinal fluid, modified by infundibular secretion, 60.
Circulation, in acapnia and shock, 152.
——, influenced by exercise, 446.
——, in kidney, 24.
——, measurement of blood flow, xx.
——, migration of liquids in the absence of the heart, xxix.
Conductivity, of nerve, affected by stretching, 323.
——, of nerve and muscle, affected by pressure, 308.
Corpus luteum, xxii.
CUSHING, H., and E. GOETSCH. Concerning the secretion of the infundibular lobe of the pituitary body and its presence in the cerebrospinal fluid, 60.

DEXTROSE, origin from cellulose, 467.
Diet, relation to respiratory quotient, 383.
Digestion, of cellulose, 467.
——, relation to respiratory quotient, 383.
Duodenum, inhibition of, during contraction of stomach, xxxi.

EMMES, L. E., and J. A. RICHE. The respiratory exchange as affected by body position, 406.

EMMES, L. E. See BENEDICT, EMMES, and RICHE, 383.
Equilibrium, nerve control of, 207.
ERLANGER, J. Observations on auricular strips of the cat's heart, 87.
Exercise, influence on circulation, 446.
Eye, constants of pupillary reaction, xxviii.
——, pupillometer experiments, xxviii.
——, shadow pupillometer, xiv.
EYSTER, J. A. E., and H. E. JORDAN. Effect of intravenous injection of extracts of the pineal body, xxiii.

FARADIC stimulation, 226.
Firefly, production of light by, 122.
Fishes, olfactory sense of, xix.
FITZ, G. W. A shadow pupillometer for the accurate study of pupillary reactions, xiv.
FITZ, G. W. The constants of pupillary reaction. (A preliminary report of experimentation with the shadow pupillometer), xxviii.
FRANZ, S. I., and W. C. RUEDIGER. Sensory changes in the skin following the application of local anesthetics and other agents. — I. Ethyl chloride, 45.

GIVENS, M. H. See HUNTER and GIVENS, xv.
Glycogen, distribution over the liver, 341.
——, removal from human subject, xxii.
Glycogenolysis, 341.
Glycosuria, by adrenalin, after thyroidectomy, 331.
GOETSCH, E. See CUSHING and GOETSCH, 60.
GREER, J. R. See MURLIN and GREER, xviii.

HATTREM, W. M., and P. B. HAWK. On intestinal putrefaction during copious and moderate water drinking with meals, xxv.
HAWK, P. B. The activity of the pancreatic function under the influence of copious water drinking with meals, xxvi.
HAWK, P. B. See HATTREM and HAWK, xxv.
HAWK, P. B. See WILLS and HAWK, xxxii.
Heart, auricular strips, rhythmical contractions of, 87.
——, relation to respiratory metabolism, xviii.
HENDERSON, Y. Acapnia and shock. — VII. Failure of the circulation, 152.
HILDITCH, W. W. See MENDEL and HILDITCH, 1.
HOOKER, D. R. The influence of pulse pressure upon renal function, 24.
HUNTER, A., and M. H. GIVENS. The allantoin-purine excretion of the monkey, xv.
Hypophysis, action of extracts of, xvii.

IMMUNITY relation to lymph, xi.
——, rôle of spleen, xvi.
Innervation, contrary, law of, xxxi.
Intestine, putrefaction in, affected by drinking water with meals, xxv.
——, resection of, influence on metabolism, 366.

JACKSON, D. E. An automatic shellacking device, xxx.
JORDAN, H. E. See EYSTER and JORDAN, xxiii.
JOSEPH, D. R., and S. J. MELTZER. Inhibition of the duodenum coincident with the movements of the pyloric part of the stomach, xxxi.

KASTLE, J. K., and A. MCDERMOTT. Some observations on the production of light by the firefly, 122.
Kidney, isolated, pulse pressure related to secretion, 24.
——, secretion of right compared with that of left, 119.

LEAPER, W. E. See MEEK and LEAPER, 308.
LEVENE, P. A., and F. MEDIGRECEANU. On nuclein metabolism in the dog, 438.
LEWIS, D. D. See MILLER, LEWIS, and MATTHEWS, xvii.
LIEB, C. W. See CANNON and LIEB, xiii.
LILLIE, R. S. The physiology of cell division. — III. The action of calcium salts in preventing the initiation of cell division in unfertilized eggs through isotonic solutions of sodium salts, 289.
Light of firefly, 122.
LOEB, J. Further experiments on the antagonistic action of salts, xxxii.
LOEB, L. The function of the corpus lutem, xxii.
LOWSLEY, O. S. The effects of various forms of exercise on systolic, diastolic, and pulse pressures and pulse rate, 446.

LUCKHARDT, A. B. See BECHT and LUCKHARDT, xi.
LUCKHARDT, A. B., and F. C. BECHT. The part played by the spleen in the formation of immune bodies, xvi.
LUSK, G. A method of removing glycogen from the human subject, xxii.
LUSK, G. On the question whether dextrose arises from cellulose in digestion, 467.
LUSK, G. The influence of cold baths on the glycogen content of man, 427.
Lymph, immune bodies in, xi.

MACLEOD, J. J. R., and R. G. PEARCE. Studies in experimental glycosuria. — VI. The distribution of glycogen over the liver under various conditions. Post mortem glycogenolysis, 341.
MARTIN, E. G. A quantitative study of faradic stimulation. — V. The influence of tissue resistance and of kathode surface on stimulating effectiveness, 226.
MATTHEWS, S. A. See MILLER, LEWIS, and MATTHEWS, xvii.
MCCLENDON, J. F. On the dynamics of cell division. — II. Changes in permeability of developing eggs to electrolytes, 240.
MCDERMOTT, A. See KASTLE and MCDERMOTT, 122.
MCKIE, J. F. See CARLSON, ROOKS, and MCKIE, xiii.
MEDIGRECEANU, F. See LEVENE and MEDIGRECEANU, 438.
MEEK, W. J., and W. E. LEAPER. Effects of pressure on conductivity in nerve and muscle, 308.
MEIGS, E. B. The osmotic properties of smooth muscle, xvii.
MELTZER, S. J. The migration of solutions in animal bodies deprived of their cardiac circulation, xxix.
MELTZER, S. J. See JOSEPH and MELTZER, xxxi.
MENDEL, L. B. See OSBORNE and MENDEL, xxvi.
MENDEL, L. B., and W. W. HILDITCH. The influence of alcohol upon nitrogenous metabolism in men and animals, 1.
Menstruation, metabolism of nitrogen in, 177.
Metabolism, glycogen, xxiii.
——, nitrogen balance during pregnancy and menstruation, 177.
——, nuclein, 438.
Metabolism of glycogen influenced by cold baths, 427.
——, proteid, affected by alcohol, 1.
——, purin, xv.
——, relation to sitting and lying, 406.
——, respiratory, relation to heart action, xviii.
——, with resected intestine, 366.
MILLER, J. L., D. D. LEWIS, and S. A. MATTHEWS. The effects of extracts of the different parts of the hypophysis, xvii.
MOORE, A. R. On the nervous mechanism of the righting movements of the starfish, 207.
MORGULIS, S. Contributions to the physiology of regeneration. — V. Regeneration of isolated segments and of small pieces of worms, 415.
MURLIN, J. R., and J. R. GREER. The heart action in relation to the respiratory metabolism, xviii.
MURLIN, J. R. Metabolism of development. — II. Nitrogen balance during pregnancy and menstruation of the dog, 177.
Muscle, conductivity, affected by pressure, 308.
——, localized contraction, xi.
——, smooth, osmotic properties, xvii.

NERVE, conductivity, affected by pressure, 308.
——, mechanism of equilibrium in starfish, 207.
Nuclein, metabolism in dog, 438.

OLFACTORY sense of fishes, xix.
OSBORNE, S. B., and L. B. MENDEL. Feeding experiments with mixtures of isolated food substances, xxvi.

PANCREAS, activity affected by drinking water with meals, xxvi.
PARKER, G. H. The olfactory sense of fishes, xix.
PEARCE, R. G. See MACLEOD and PEARCE, 341.
Peristalsis, gastric, xii.
Permeability, affected by calcium salts, 289.
——, relation to electrolytes, 240.
PIKE, F. H. The mechanism of the asphyxial rise of blood pressure in the spinal animal, xxii.
Pineal body, effect of extracts, xxiii.

Pituitary body, secretion of infundibular lobe, 60.
PORTER, W. T. The relation of afferent impulses to the vasomotor centres, 276.
Pregnancy, metabolism of nitrogen in, 177.
Proteins, individual, significance in nutrition, xxvi.
Pulse pressure, in pulmonary circuit, xxi.
Pupillometer, xiv.

REGENERATION of segments, 415.
Respiratory exchange, affected by body position, 406.
Respiratory quotient, related to diet, 383.
RICHE, J. A. See BENEDICT, EMMES, and RICHE, 383.
RICHE, J. A. See EMMES and RICHE, 406.
ROOKS, J. F. See CARLSON, ROOKS, and MCKIE, xiii.
RUEDIGER, W. C. See FRANZ and RUEDIGER, 45.

SALTS, antagonistic action, xxxii.
SCHREINER, O., and M. X. SULLIVAN. Biological analogies in soil oxidation, xxv.
Secretion, relation to blood pressure, 24.
Shellacking device, xxx.
Shock, in acapnia, 152.
SIMPSON, S. Are the parathyroids capable of replacing the thyroids functionally, xxvii.
Skin, effects of local anæsthesia, 45.
Soil oxidation, xxv.
Spinal cord, reflexes affected by lesions of dorsal roots, 212.
——, transection, effect of, on asphyxial rise of blood pressure, xxii.
Spleen, its part in immunity, xvi.
STEWART, G. N. Measurement of the blood flow in man, xx.
STILES, P. G. See BARBOUR and STILES, xi.
Stimulation, faradic, relation to tissue resistance and kathode surface, 226.
Stomach, movements of, xxxi.
——, receptive relaxation, xiii.
——, secretion affected by drinking water with meals, xxxii.
Stretching nerves affects conductivity, 323.
Sullivan, M. X. See Schreiner and Sullivan, xxv.

THYROID, removal, relation to adrenalin glycosuria, 331.
Thyroidism, xiii.
Thyroids, replacement by parathyroids, xxvii.

UNDERHILL, F. P. The metabolism of dogs with functionally restricted small intestine, 366.
UNDERHILL, F. P. The production of glycosuria by adrenalin in thyroidectomized dogs, 331.

VASOMOTOR centre, relation to afferent impulses, 276.
Vasomotor reflexes, 276.

WATER drinking, with meals, effect on intestinal putrefaction, xxv.
——, ——, effect on pancreatic function, xxvi.
——, ——, stimulation of gastric secretion, xxxii.
WIGGERS, C. J. Pulse pressure variations in the pulmonary circuit, xxi.
WILLS, F., and P. B. HAWK. The stimulation of the gastric secretion under the influence of water drinking with meals, xxxii.

GENERAL LIBRARY,
UNIV. OF MICH.
MAR 3 1911

THE AMERICAN JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

CONTENTS

CONTRIBUTIONS TO THE PHYSIOLOGY OF REGENERATION. — V. REGENERATION OF ISOLATED SEGMENTS AND OF SMALL PIECES OF WORMS. *By Sergius Morgulis* 415

THE INFLUENCE OF COLD BATHS ON THE GLYCOGEN CONTENT OF MAN. *By Graham Lusk* 427

ON NUCLEIN METABOLISM IN THE DOG. *By P. A. Levene and F. Medigreceanu* 438

THE EFFECTS OF VARIOUS FORMS OF EXERCISE ON SYSTOLIC, DIASTOLIC, AND PULSE PRESSURES AND PULSE RATE. *By Oswald S. Lowsley* 446

ON THE QUESTION WHETHER DEXTROSE ARISES FROM CELLULOSE IN DIGESTION. *By Graham Lusk* 467

VOL. XXVII. — No. V.

Issued March 1, 1911

BOSTON, U.S.A.

1911

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume, sent postage free to subscribers in the United States and Canada, is five dollars; to subscribers in other countries, five dollars and twenty-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay Post Office, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

Copyright, 1911, by THE UNIVERSITY PRESS.

Printed at The University Press, Cambridge, Mass.

Entered at the Boston, Mass., Post Office as second-class mail matter, Feb. 12, 1903.
